NORVI CONTROLLERS

NORVI X-Q4 | 4 x Transistor Outputs

The **NORVI X-Q4** is an 4 x Transistor Outputs Expansion module designed for the NORVI X modular controller platform.

It provides four high-side switching channels suitable for driving industrial actuators, relays, and solenoids. The outputs are optically isolated for circuit protection and utilize high-side MOSFET switches, enabling reliable control of DC loads with integrated fuse protection for industrial safety.

Product Features

- 4 × Transistor Output channels
- High-side switching (up to 24V DC)
- Full optical isolation for circuit protection
- Integrated fuse and surge protection per channel
- Individual LED status indicators
- Designed for NORVI X modular architecture

Applications

- Industrial actuator and valve control
- Driving DC relays and contactors
- Tower light and alarm signal management
- Modular PLC Output Expansion
- Factory automation and solenoid switching
- Remote device power triggering

NORVI CONTROLLERS

NORVI X-Q4 | 4 x Transistor Outputs

Main

Range of Product	NORVI X
Product type	Expansion Module for NORVI X Series
Certifications	EN 61131-2:2007 EN 61010-1:2010+A1:2019 EN IEC 61010-2-201:2018 2014/30/EU- Electromagnetic Compatibility (EMC) Annex III, Part B, Module C
Rated supply voltage	24V DC

Complementary

Product Part Numbers	NORVI X-Q4
----------------------	------------

Mechanical Properties

Enclosure	NORVI X-N1
Mounting / Installation Method	DIN RAIL
Terminal Type	Push-in terminal
Terminal Arrangement	Front
Length	81.00 mm
Height	104.00 mm
Width	23.00 mm

DATASHEET

NORVI CONTROLLERS

NORVI X-Q4 | 4 x Transistor Outputs

Environment

IP degree of protection	IP20
Operating altitude	0 - 2000 meters
Operating Temperature	- -10 ... +85° C (14...185 °F)
Storage altitude	0 - 3000 meters
Shock resistance	15 gn for 11ms
Resistance to electrostatic discharge	4kV on contact 8kV on air
Resistance to electromagnetic fields	10 V/m (80 MHz 1GHz) 3 V/m (1.4 MHz 2 GHz) 1 V/m (2 MHz 3 GHz)

Electrical Characteristics

Grid Powered Devices

Rated Supply Voltage (V)	24V DC
Current Consumption (mA)	80mA @ 24VDC

I/O Specifications

Parameter	Specification
Number of Outputs	4 Transistor Output Channels
Output Type	High-Side Switch
Switching Transistor	P-Channel MOSFET
Isolation Type	Optocoupler Isolation
Operating Voltage	24V DC Nominal
Overcurrent Protection	Per-channel resettable PTC fuse
Gate Protection	Zener Diode clamp
Switching Frequency	High-Speed
Output Diagnostics	Individual LED indicators
Field Connector	5-Pin Terminal Block (TR1, TR2, TR3, TR4, GND)

Terminal Configuration

No.	Terminal	Description
1	TR1	Transistor Output 1
2	TR2	Transistor Output 2
3	TR3	Transistor Output 3
4	TR4	Transistor Output 4
5	GND	Ground
